INDUSTRIAL & OFFICE

AESSEAL FACADE

CLIENT:

AES Engineering Limited

PROJECT:

AESSEAL FACADE

LOCATION:

Bradmarsh Business Park, Mill Close, Templeborough, Rotherham S60 1BZ, located off the A6178 Sheffield Road. The site is approximately 1 mile south of Rotherham town centre and 6.5 miles north-east of Sheffield city centre.

SIZE:

59,093 sq.ft.

Following our successful completion of the client's 59,093 sq.ft. "Workshop of the Future" project, we were awarded the contract to update the façade of the existing adjacent premises, to the same standards.

The project consisted of the removal of the existing external wall cladding, fascias, soffits, gutters and rainwater pipes followed by the installation of new thermally efficient wall cladding and soffit overhang that was wrapped around the perimeter of the building.

A new double-height meeting room was created, and a full height curtain walling section introduced to enhance it.

Internal offices were created, and new windows and doors were installed.

The site remained fully operational throughout the entire duration of the works and BDB ensured there was minimal disruption caused to the operation of the existing facility.
